BUSINESS IS CHANGING...
IS YOUR DATA CENTER READY?

To prevent service interruptions in your data center, you must first identify the underlying risks.

Today's businesses are moving at a rapid pace. Every time your business needs change, so do the needs of your data center. That's why ICS makes assessing the current state of your data center easy.

For many Fortune 1000 companies, ICS has provided answers for minimizing risk in complex data centers.

Our team of highly experienced consultants delivers world-class data center assessment services based on known risk categories while also providing a report to assist in meeting your strategic business goals.

What we deliver

- **Review of data center risk categories customized to your unique business requirements**

- **Summary report of exposures and risks**

- **Actionable, prioritized remediation recommendations**

- **Assessment scorecard**

WHY ICS?

It takes the integration of IT management experience and data center facilities management experience to optimize the efficiency of your data center. ICS understands both sides of the equation. We bring together both disciplines for optimal results.

Experience: Every one of our consultants have been in your shoes, and we believe that makes a distinct difference in how we engage and advise our clients. Our consultants draw on decades of experience as senior managers for IT and data center operations at Fortune 500 companies. They understand the demands of complex data center management and planning, giving you a strategic partner who understands your technical, business, and operational challenges.

Methodology: During the 18 years that ICS has been in business, we have devised a methodology based on industry best practices and proven results. Our consultants know how to get things done effectively and quickly, leveraging innovative toolsets and automated processes to expedite results.
